About Me: The application is a free to use calendar-based application to help women determine when to get or avoid pregnancy. You will need to have a menstrual cycle tracker to use this application. For a comprehensive and accurate menstrual cycle tracker, use this application. It will let you know when you can expect your next period, the length of your menstrual cycle and you will know the likelihood of pregnancy. Ovulation Calendar is a simple-to-use application available for Windows and Mac, designed to help women keep better track of their ovulation schedule, whether the goal is to conceive a baby or avoid pregnancy. Monitor your fertile cycles to know when to get or avoid getting pregnant Based on the specified menstrual cycle and goal, it generates a personalized calendar with highlights on the important days, such as period, fertile and infertile days. Installing this tool shouldn't take long. However, make sure you have .NET Framework installed or it won't work properly. Once launched, Ovulation Calendar displays the calendar and marks the current day as the last period date, by default. Set the last period date, length, and other info You can head over to the options menu to make the necessary adjustments when it comes to the last period date, period length (between 20 and 40 days, default is 28) and luteal phase length (a stage that occurs after ovulation and before period, between 9 and 16 days, default is 14). If you're unsure about the lengths, you can leave them to default. Furthermore, you can tell Ovulation Calendar that you're looking to either conceive a baby or to avoid pregnancy, as well as set the tool to automatically run at every Windows startup, without your intervention. Figure out what each symbol means The new calendar gets generated as soon as you confirm these settings, and you can navigate between months. As far as the symbols are concerned, the white boxes represents infertile days, where probabilities to get pregnant are very low, red boxes are period days, and the dark green box is the ovulation day. When it comes to the light green boxes, the ones that have a heart are fertile days when there are high chances of conceiving a baby, the ones with the boy and girl indicate whether it's more likely to conceive a boy or a girl, while the ones with the red sign tell you that it's best to avoid intercourse on these days if you wish to avoid getting pregnant. All this is explained in the legend panel. Compatibility issues with Windows 10 The application is very easy to use. However, it displayed an error when attempting to change the goal on Windows 10 in our tests. This might be because Ovulation Calendar hasn't been updated for a long time and
